# Simple and Cost-Effective Way to Use UC&C and Mobility Solutions

Unified Communications Platform, iPECS UCP

iPECS UCP is Ericsson-LG Enterprise's unified communications platform designed to meet SMB and Enterprise communications needs. As ground breaking innovative platform, iPECS UCP provides out of box UC and Mobility solution. In addition, iPECS UCP is scalable for premium UC.

## Easy and economical UC

iPECS UCS Standard server is built in UCP. Users can use video, IM, audio conference, visual voice mail, as well as voice calls on one platform. As external server, iPECS UCS Premium server provides more various collaboration features.

## Increase reliability with distribution architecture

Geographical / Server redundancy and T-Net features provide high reliability and makes management very easy for both local and remote offices.

## Anytime & Anywhere Connectivity

iPECS UCS mobile client, Mobile Extension, DECT, and Wi-Fi terminals are optimized. Mobile communications are available both in and out of the office.

## Improved business performance

iPECS CCS, IPCR, Attendant, NMS, Voice Mail, Click Call, and Microsoft Lync are optimized. These applications help users build a unified and efficient communications solution fit with user's business situation.

## Simple installation and management

Web management (i.e. install wizard) based on HTML5 helps the administrator can install easily and changes the configuration simply.

## Efficient investment

Capacity can be expanded by a simple license. Users can save on initial cost and can invest for additional license as their business grows.

## Three Models of UCP

Users can simply expand capacity of their system starting with a base UCP100, UCP600, UCP2400 with license of iPECS UCP

# Competitive Feature Set

Built-in system feature set and UC server provide various applications and collaboration features to meet the variety of customer's needs

## One number service

Personal Group consisting of your master station and group member stations (maximum 32 including your master station) can be configured by the system Administrator. When user's master station receives a call all members also receive the call and when placing a call the master station number, access and dialing restrictions are used. Each member can still receive call to the member station number.

## Embedded Voice Mail

Voice Mail is built in iPECS UCP and it supports various voice mail features such as Multi language Auto Attendant, VM Cascading, E-mail Notification of voice mail, centralized voice mail and more. UCP100/600(Built-in VM), UCP2400(UVM required)

## System Geographic Redundancy

iPECS UCP system supports redundant processor operation. The redundant system processor is a hot standby processor. The standby UCP monitors the active UCP and if the Active UCP fails or reset, the standby UCP will take over and maintain control of the system.

## Embedded Hotel Features

iPECS UCP is embedded hotel features and provides PMS interface. It supports standard hotel features like Check-in/out, Room status, Billing, Emergency call, Wake up, Register mini-bar information in room and Customer information. License required for this features.

## Mobile Extension

User's mobile phone may be registered to a station allowing the mobile phone to place and receive calls through the system. DID calls are sent to user's iPECS. IP or LDP Phone and registered mobile phone simultaneously. If the mobile phone is paired with a hunt group station, Hunt group calls routed to the station can also ring to user's mobile phone.

## Centralized Control T-NET

In a Centralized control T-NET (Transparent Network), a central UCP controls all remote modules and terminals providing transparent networked access to all the features and functions of the central iPECS systems as well as the resources connected to iPECS systems. In addition, it provides fail-over option.

## Embedded SIP

iPECS UCP is embedded SIP features. As embedded SIP, system supports SIP trunk and 3rd party SIP based devices and applications. Users can compose various communication resources with iPECS UCP.

## Powerful Call Handling Features

iPECS UCP provides more than 300 features for call handling. Built-in ACD, Hot desking, Individual call routing, Incoming caller ID based call routing, Web call back and more.
